LihatDulu

Identitas untuk memilih furnitur dengan mata terbuka.

Brand guide / V5.1 / 2026

A marketplace built around looking closely

A considered purchase begins with evidence you can understand.

LihatDulu

**lihat dulu,
baru pilih**

Purpose

Make the condition, dimensions and handling context of a pre-owned piece legible before a buyer commits.

Signal	careful evidence over urgency

The aperture is the product idea

One silhouette joins the act of looking with the frame of a piece of furniture.

The outer frame keeps the mark recognisable at small sizes. The inset opening creates a deliberate pause, while the lower bar anchors it like a shelf or cabinet base.

OPEN APERTURE

A clear invitation to inspect.

FURNITURE FRAME

A grounded object, not a generic tech icon.

Symbol, wordmark and lockup variants

Use the full lockup when the name carries recognition. Use the mark when space is scarce.

LihatDulu

Mark only

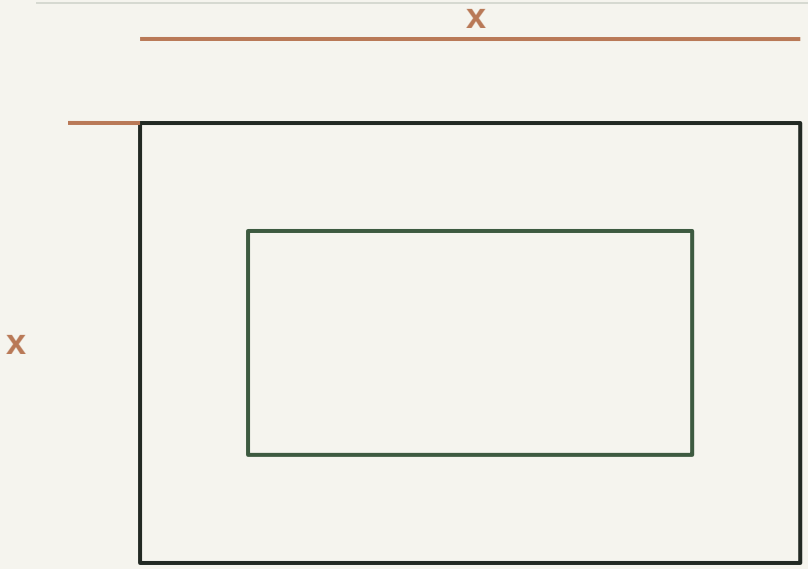

LihatDulu

Wordmark only

Small-size lockup

Construction and clear space

The clear space is measured from the mark’s internal opening. Keep the lockup quiet around it.

x = width of inner opening

- Minimum clear space: 1x on all sides
- Optical alignment follows the wordmark baseline
- Do not place inside a crowded product image

Legible at the size people actually use

The mark stays open and distinct in browser chrome, mobile navigation and seller tools.

Favicon

Mobile mark

24 px

Compact lockup

72 px

Editorial lockup

128 px

At 16px, preserve the mark only. The wordmark needs 72px of width to keep its counters open.

Colour carries role, not decoration

Bone and charcoal establish a calm field. Moss marks action and care. Yellow marks discovery and selected state.

A warm editorial note inside a clear interface

Plus Jakarta Sans handles every interaction. Georgia appears only where the brand needs a slower reading pace.

Judul pembuka dan brand story

Body 16–18 px / Headline 34–58 px / Label 12–14 px

A quiet frame for an object with a history

The interface gives imagery room while keeping evidence close to the decision.

The image is evidence, not wallpaper

Product imagery shows the piece from enough angles to support a decision.

Front silhouette

Working detail

Disclosed wear

Captions name what the viewer can verify. Condition language remains specific and honest.

Control language for looking and deciding

Quiet controls keep attention on the object, while state is always visible.

Mobile navigation preserves the reason to return

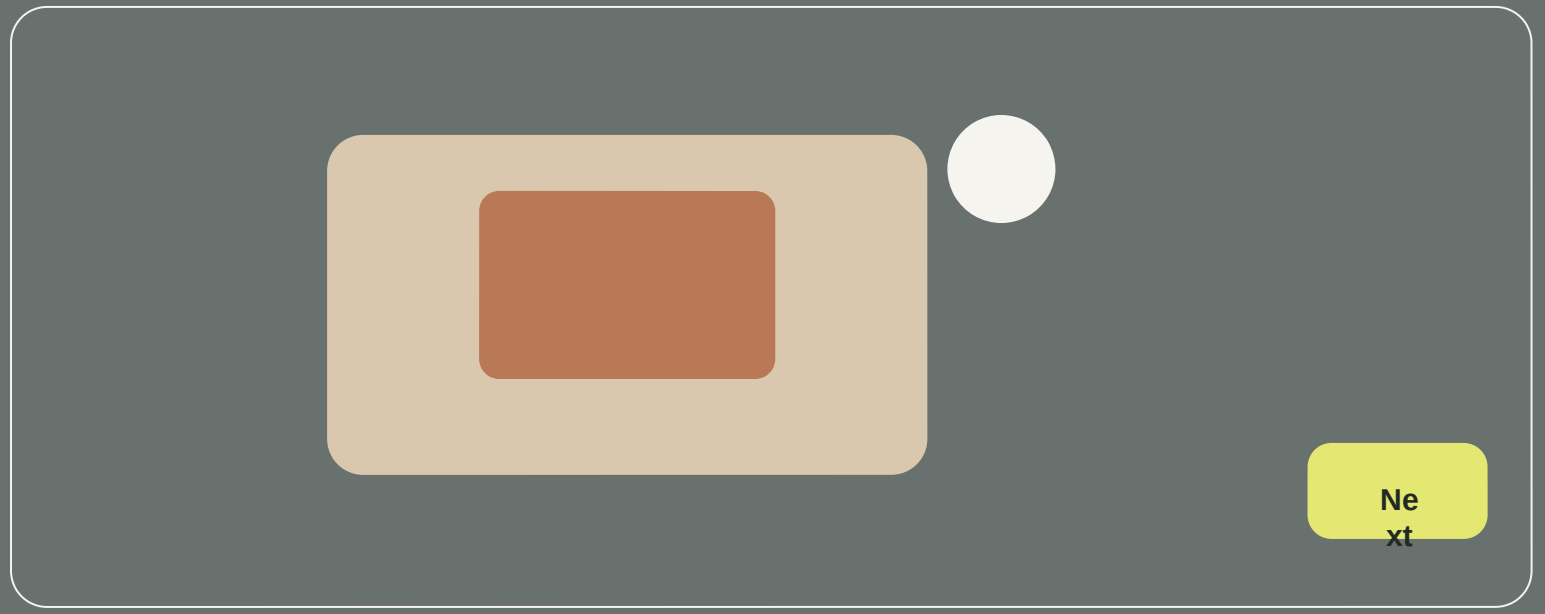

The app keeps role switching, search and cart reachable without hiding the object.

- Header keeps role switch visible
- Cards stay two-up when type remains readable
- Cart and saved state survive route changes

Capture is an intentional room

Neutral grey removes distraction. Controls remain recognisable and reachable.

Capture surface

Large Sora, minimal controls, visible progress and a reachable exit keep the seller oriented.

Reduced motion keeps framing changes functional.

Motion explains change

Rotation, articulation and selection respond to intent. Decorative movement stays out of the way.

Idle

Poster stays useful

Camera eases to detail

Open

Door follows one control

Reduced

State change without travel

Motion is a cue for state, never a reason to delay access to product facts.

A partner treatment without losing the mark

A co-branded event uses a quiet lockup and keeps LihatDulu legible.

Example placement for a non-endorsing collection or pickup partner.

The identity is ready to build

One source of truth keeps the marketplace, seller tools and capture room coherent.

- Use app/src/brand-tokens.css for role tokens and accessible state colours
- Use the original SVG files for all lockups and favicon variants
- Keep product facts canonical across catalogue, viewer and checkout
- Keep prepared examples honest and label local draft state
- Recheck mobile capture controls at constrained widths
